Assignment 7.3 - Solution

Responsive Product Listing

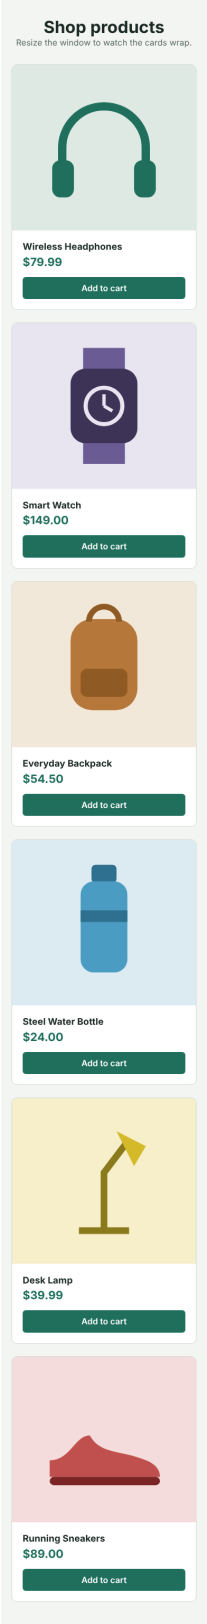

Screenshot: desktop width (1280px) - 3 cards per row

Screenshot: tablet width (768px) - 2 cards per row

Screenshot: mobile width (390px) - 1 card per row

How the requirements are met

1-2. At least 6 cards with image, name, price, button

Six **<article class="card">** elements, each with an SVG product image, an **<h2>** name, a price and an **Add to cart** button.

3. display: flex and flex-wrap: wrap

.products { display: flex; flex-wrap: wrap; } lets cards sit in rows and move to a new line when space runs out.

4. Spacing with gap

gap: 1.5rem adds equal space between cards in both directions, with no margins needed.

5. flex-grow, flex-shrink, flex-basis

flex-basis: 260px is the ideal card width. **flex-grow: 1** lets cards share leftover space on a row so each row fills the width. **flex-shrink: 1** lets a card shrink below its basis if needed.

6. Wrapping on smaller screens

When a row cannot fit another 260px card plus the gap, the next card wraps. Result: 3 per row on desktop, 2 on tablet, 1 on mobile - without any media queries.
